### NIH Issues Final Rules Governing Embryonic Stem Cell Research

*Monday, July 06, 2009*  
*Reuters*

The National Institutes of Health on July 6 released new rules governing federally funded research on human embryonic stem cells, loosening some ethical requirements that scientists said could have cost them a decade of work.

### Molecular Differences Found Between Embryonic Stem Cells And Reprogrammed Skin Cells

*Thursday, July 02, 2009*  
*Stem Cell Research News*

Researchers in California have found that embryonic stem cells and skin cells reprogrammed into embryonic-like cells have inherent molecular differences, demonstrating for the first time that the two cell types are clearly distinguishable from one another.

### Discovery Pinpoints New Connection Between Cancer Cells, Stem Cells

*Thursday, July 02, 2009*  
*Stem Cell Research News*

A molecule called telomerase, best known for enabling unlimited cell division of stem cells and cancer cells, has been found to have a surprising additional role in the expression of genes in an important stem cell regulatory pathway, researchers report.

### Heart Attack Patient Treated With His Heart Stem Cells In Clinical Trial

Tuesday, June 30, 2009

Stem Cell Research News

Doctors in California said on June 30 that they have completed the first procedure in which a patient's own heart tissue was used to grow specialized stem cells that were then injected back into the heart to repair and re-grow healthy muscle that had been injured by a heart attack.

### Scientists Convert Pigs' Connective Tissue Cells Into Stem Cells

Saturday, June 27, 2009

Stem Cell Research News

Scientists have developed the ability to take regular cells from a pig's connective tissues, known as fibroblasts, and transform them into stem cells, eliminating several of the hurdles associated with embryonic stem cell research.
